DETAILED ACTION

1. According to paper filed on Sep. 28, 2006, the applicants have amended claims 1-5, 8, 9, 11 and 15.
2. Claims 1-6 and 8-15 are pending in the application.

Response to Arguments

3. Applicant's arguments filed on Sep. 28, 2006 have been fully considered but they are not persuasive regarding enablement rejection. The applicants have amended claims to overcome indefiniteness and prior art rejections. However, the amendment to claim 1 now introduces new matter as will be discussed later under new grounds of rejection. In regard to enablement rejection, the applicants mention that a listing of the relevant prior art references is attached for the examiner's reference. However, none of these references were submitted in order for proper evaluation of enablement issues in regard to treating other disease conditions besides treating pain.

Conclusion

4. Rejection of claim 8 under 35 U.S.C. 112, first paragraph is maintained for the reasons of record.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1625

6. Claims 1, 3, 5, 6 and 8-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicants have amended claim 1 in the last two provisos to insert the value of variable R4 as hydrogen and furthermore, added a new proviso to overcome two prior art references. However, these changes introduce new matter since this changes the original core of the compounds disclosed in the original specification.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1, 3, 4 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, value of variable R4, line 2, alkyloxy should be alkyloxy.

In claim 3, line 1, after claims 1 or 2, the applicants should insert --- in which ----.

In claim 4 line 1, after claim 2, the applicants should insert --- in which ----.

In claim 8, line 1, after method, the applicants should insert --- of ----.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
